

Cristian Camilo Forero Murillo

Systems Engineer | SAP ABAP Developer

Bogotá, Colombia · +57 316 436 9023 · ccforerom@gmail.com · [linkedin.com/in/cristian-camilo-forero-murillo](https://www.linkedin.com/in/cristian-camilo-forero-murillo)

PROFESSIONAL PROFILE

Systems Engineer and SAP ABAP Developer with experience building and maintaining solutions within the SAP ecosystem, ranging from reports and data-management tools to system integrations and business process automation. Comfortable working across development, support, and continuous improvement projects, with a strong interest in understanding the business behind each requirement in order to deliver solid solutions. Currently expanding my skill set into SAP S/4HANA, SAP BTP, and Cloud development, with the goal of continuing to grow within the SAP ecosystem.

WORK EXPERIENCE

IT Back End Software Engineer (ABAP Developer) | Schlumberger

July 2026 – Present · Cota, Cundinamarca, Colombia · Hybrid

- Developing SAP ABAP backend solutions within a large-scale corporate environment, adapting to the standards, best practices, and development processes of a multinational organization.

ABAP Technical Developer | Just Time Consulting Group

January 2025 – July 2026 (1 year 7 months) · Bogotá, Colombia · Hybrid

- Developed and maintained reports for tracking, monitoring, and analyzing business processes across different areas of the company.
- Integrated and updated information between systems through the consumption and development of both standard and custom services.
- Automated business processes through approval and notification workflows, reducing manual tasks and processing times.
- Contributed to electronic invoicing and electronic payroll projects for multiple countries, ensuring compliance with local regulatory requirements.
- Designed and adjusted forms and print interfaces for business document processes.
- Provided technical support and incident resolution in production environments, prioritizing operational continuity.
- Collaborated as a developer on a chatbot project integrated with SAP, contributing backend business logic.

OT Cybersecurity Intern | Henkel

July 2023 – January 2024 (7 months) · Bogotá, Colombia · Hybrid

- Supported information security and cybersecurity management within operational technology (OT) environments.
